SUMMARY

Cybersecurity-focused Computer Science student with hands-on experience in Linux, Kali Linux, VMware, and secure web application development. Skilled in Python, C++, networking fundamentals, and cybersecurity concepts with practical exposure through internship projects and academic work. Passionate about ethical hacking, threat detection, and building secure systems.

INTERNSHIPS

CYBERSECURITY INTERN

Ediglobe

- 2 Months
- Configured and managed Kali Linux virtual machines using VMware for cybersecurity testing and Linux administration tasks
- Performed system updates, MAC address spoofing, user management, and Linux command-line operations in secure virtual environments
- Developed a secure web application with login and signup functionality implementing password protection, input validation, and basic protection against SQL injection and XSS attacks
- Worked with networking and cybersecurity fundamentals including secure authentication and system hardening concepts

EDUCATION

BACHELOR OF ENGINEERING (BE) IN COMPUTER SCIENCE

2023 – 2027

EAST WEST COLLEGE OF ENGINEERING

- Relevant Coursework: Data Structures & Algorithms, Computer Networks, DBMS, Operating Systems, Cybersecurity
- CGPA: 8.6/10

HIGHER SECONDARY (CLASS XII)

2021 – 2023

St CLARET PRE-UNIVERSITY COLLEGE

- Scored 87% with a focus on Mathematics, Physics, Chemistry and Computer Science
- Demonstrated strong analytical and problem-solving skills through core science subjects.

RELEVANT SKILLS

Technical Skills

Programming Languages

C++, Python, Java, JavaScript

Web Technologies

HTML, CSS, JavaScript

Databases

MySQL

Cybersecurity & Tools

Linux, Kali Linux, VMware, Cybersecurity Fundamentals

Core Computer Science

Data Structures & Algorithms, DBMS, Operating Systems, Computer Networks

Soft Skills

Problem solving, Quick learner, leadership, team collaboration, analytical thinking, communication skills

CERTIFICATES

Introduction to Cybersecurity

Cisco Networking Academy

Cybersecurity Job Simulation

Deloitte

ACADEMIC PROJECTS

QR CODE BASED ATTENDANCE SYSTEM

HTML, CSS, JavaScript, MySQL

- Developed a QR-code-based attendance management system for automated student verification and attendance tracking
- Implemented QR validation and duplicate entry prevention to improve attendance accuracy and reduce manual work
- Designed a user-friendly interface for quick attendance scanning and record management

AI-BASED INTRUSION DETECTION SYSTEM (ONGOING)

Python, Machine Learning, Pandas, Scikit-learn

- Developing a machine learning-based intrusion detection system to identify malicious network traffic patterns
- Analyzing network traffic datasets using Python libraries such as Pandas and Scikit-learn
- Training classification models to improve detection accuracy and identify suspicious network behavior
- Exploring cybersecurity applications of machine learning for threat detection and network security

SECURE WEB APPLICATION

Node.js, Express.js, MongoDB Atlas, EJS, CSS, Render

- Developed a secure web authentication system with signup, login, and protected dashboard functionality using Node.js and Express.js.
- Integrated MongoDB Atlas for cloud database storage and implemented password encryption using bcrypt.
- Implemented session-based authentication, input validation, and security measures against common web vulnerabilities.
- Deployed the application live on Render and managed the project using Git and GitHub.
